

## Juno Customs Solutions' All-Inclusive Brokerage Management Solution

Our intuitive brokerage platform, Entry Insight, is designed to empower importers in their compliance by providing organization, detailed recordkeeping capabilities, and document management solutions, all while establishing oversight for entry data and serving as proof to Customs of their due diligence.

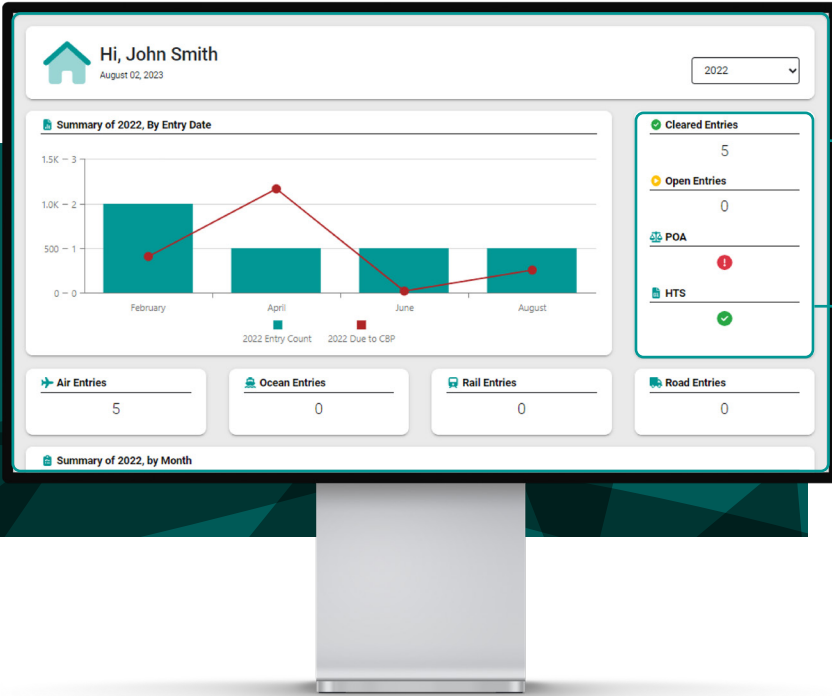

### ENTRY INSIGHT PROVIDES INSTANT ACCESS TO:

#### HOMEPAGE

An overview, with a graph display, of the entry count and valuations for that current year.

#### COMPLIANCE INDICATORS

Interactive mode of transport cards, POA management, and product HTS database.

#### FILING HEADER

Entry-specific information including the associated supply chain partners, unloading and entry ports, bills of lading, conveyance, and bond details.

#### FILING DETAILS

A summary of valuation, fees and cost distribution for the specific entry. Entry lines display a detailed breakdown of the invoice and 7501.

#### TOP THREE FEATURES: CLIENT INPUTS

**Notes** Notes may be added to the client portal for clear communication to the JCS team without requirement of emails. Notations from JCS will also be visible within the portal.

**References** Entry references inserted by JCS within the portal references are visible to the client — such as Purchase Order, Customer Reference Number, or Other Reference.

**Files** Immediate visibility to your ISFs and clearance status with direct access to your Customs compliance data in Entry Insight.
